

DATASHEET

Supercharge Your Scriptless Test Automation with Perfecto Training

If you are graduating your testing practice from manual to automated with Perfecto Scriptless testing, congratulations! Scriptless testing is a powerful and effective way to create automated scripts quickly in less time, and without requiring technical scripting or coding skills to do so. Before you dive in, it's important to get acquainted with the platform and processes to best set your team up for success.

This 8-hour training will cover everything your team needs to know about Scriptless Test Automation, including creating and running tests, integrating with your CI/CD tools, debugging, script maintenance, reporting and more.

At the end of the training, you and your team will have the necessary skills and resources to self-sufficiently manage your scriptless test automation practice.

Prerequisites: This offering is designed for existing Perfecto customers who have Scriptless Test Automation enabled in their cloud environment. For best results, customers should provide 3 basic automation scenarios for the Perfecto Professional Services team to get started on.

Training Outline

ESTIMATED TIME TO COMPLETE: 8 HOURS

Topic 1 (up to 1.5 hours)

Intro to Scriptless and First Test

- Introductions
