

PROFESSIONAL SERVICES DATASHEET

Quick Start Onboarding and Implementation

Experience success right from the start with Perfecto through a personalized onboarding or implementation session.

You can take advantage of our **Quick Start Express Onboarding** to learn the essentials of how to use Perfecto — or dive deeper into automation with our **Quick Start Implementation** where we'll even help you achieve an automated test case on your test application.

Key Benefits

- **Gets your team up to speed quickly** so you're taking full advantage of the many features and capabilities available to you with Perfecto
- **Delivers expert deployment assistance**, with key recommendations and an implementation option to optimize and integrate your framework with Perfecto
- **Provides you with answers straight from the pros** on typical setup questions, best test automation practices and more (with a path to more in-depth services if needed)
- **Accelerates your return on investment in Perfecto** by ensuring your success from day one.

Quick Start Express Onboarding

Learn the key features and capabilities of Perfecto through a one-on-one session directly with a Perfecto expert.

Quick Start Express onboarding is tailored for individual testers or developers as well as smaller teams who could benefit from a basic overview and introductory session. We'll cover both manual testing and automated testing in this 3-hour session, including the following components and topics:

- Walkthrough of Perfecto manual testing, Perfecto reporting, assets management, reservations, and failure reasons
- Walkthrough of how to connect a sample template automation script with Perfecto Cloud, and a report integration code explanation
- Discussion and overview of Perfecto's high-level proprietary visual functions and features like HAR capture, accessibility testing, biometric authentication, image injection, Rest API documentation, and Scriptless
- Q&A time reserved for feedback and answers to your questions

At the end of the session, we provide sample code you can use in your script automation — for troubleshooting or additional set-up, our Services team has expertise and can be engaged for personalized assistance.

Quick Start Implementation

Dive deeper into automated testing through our Quick Start Implementation¹ where we'll optimize and integrate Perfecto into your automation framework — and help you achieve automation for one test case.

We tailor this onboarding and implementation to small and mid-size customers who are just getting started on test automation using Perfecto along with those who want to integrate reporting into their environment and those who would benefit from learning coding best practices with cloud.

Quick Start Implementation allocates 16 hours for the following components and topics:

- An introductory training on Perfecto and a high-level discussion about your automation framework
- Integration of your framework with Perfecto Cloud along with Reports integration
- Assistance in automating your first test case on your test application, either web or mobile
- Tips and best automation practices when working with the Perfecto Cloud and designing reusable steps in the project
- Integration of the CI Dashboard with your framework with the ability to run from the command line/CI tool, depending on your setup
- **See next page for a comparison of our Quick Start Express Onboarding and Quick Start Implementation packages.**

¹For an optimal onboarding experience, we recommend teams selecting our Quick Start Implementation have a base level of competency with their coding language and Selenium/Appium. We also recommend you complete VPN access and access to Perfecto in advance, with appropriate proxy host and port details configured.

Get Started Today

Use Perfecto with confidence right from the start! Our Services team is here for you to ensure a successful onboarding and implementation experience — getting you up and running quickly and optimally, according to best practices.

We also offer training courses that pair perfectly with your onboarding and implementation, as well as consulting services and programs to ensure teams of developers and QA professionals are highly successful throughout all stages of test automation for web and mobile devices.

Contact us for more information and to supercharge your success with Perfecto!
