

DATASHEET

Health Check

Is your testing doing everything you need it to?

BUSINESS CHALLENGE

In order to get the most out of your web or mobile applications, it is imperative that they be put through a robust and rigorous testing gauntlet. The quality of your apps is intrinsically linked to the quality of your testing strategy. Luckily, if you have chosen to partner with Perfecto you have partnered with the platform the industry trusts the most.

This Perfecto Health Sheet is designed as a helpful guide to you and your team to ensure your testing is being run exactly as you need it to. Leveraging a Perfecto expert will give you a foundational understanding of how your current testing strategy is operating, where it can be improved or altered, and where you can trim the fat of wasted resources.

Benefits Overview

The Perfecto Health Check is designed for Perfecto customers who are:

- Wanting an expert review how you're currently doing, what you can do better, and what has changed with your Perfecto implementation over time.
- Having undergone staffing or technology changes that may impact your use of Perfecto.
- Wanting an expert recommendation on next steps based on a review of your current configuration management goals and areas of concern.

CUSTOMER BENEFITS

- Expert review of Perfecto-related goals, systems, processes, and workflows.
- Identify areas for improvement and learn how best to address them.
- Guidance on testing capabilities.
- Ensure your team is operating according to best practices.

EXPECTED OUTCOMES

- Clear path forward to maximize ROI of your Perfecto cloud in accordance with business and testing strategy goals.
- Technology alignment with desired business outcomes, including potential for scale.
- Minimize business disruption resulting from staff turnover or technology changes.

What You Can Expect

Through a combination of stakeholder interviews, current testing inspections, and data gathering, a Perfecto consultant will produce a report on your use of Perfecto. This report covers the state of your installation, conformance with best practices, workflow assessment, and recommendations for optimization.

Below are the topics a Perfecto expert can help you with. View the checklist for detailed questions you can ask yourself to prepare for your conversation:

TEST EXECUTION

The ways in which you set up your testing. From code development to real and/or virtual device usage (current & anticipated) and so much more.

TEST MAINTENANCE

Determining defects and bugs in your tests, assessing test downtime, and understanding the allocation of your resources.

TEST REPORTING

Properly analyzing the efficacy of your tests and the results produced by them. Determining the reasons why tests may be failing and what those failures mean.

BUSINESS GOALS

How your testing is working for your business goals and what you are currently doing to ensure your team is prepared.

Assumptions

- Engagement timeline and project parameters to be established at the outset.
- All services will be delivered remotely unless otherwise agreed upon.
- Customer practitioner will be available to work with Perfecto for the duration of the engagement.
- The Perfecto Engineer does not require direct access to customer systems or network.
- This service is for a single team's Perfecto usage.

You invested in Perfecto for success. Perfecto is invested in *your* success.
