

PRODUCT BRIEF

Mobile and Web App Testing – Perfected.

Access the world’s smartest continuous testing platform anywhere, anytime.

DevOps teams are under constant pressure to release faster, improve quality, reduce risks, and keep costs under control.

With one cloud-based testing lab, organizations can solve these challenges head on. Test confidently and continuously at DevOps speed with Perfecto’s continuous testing platform. From creation to execution and analysis, Perfecto has a proven, unified solution for your mobile and web testing needs.

CREATE

Whether you need help with test authoring, maintenance, management, validations, or debugging, Perfecto has a solution for you. Automate advanced and hard-to-test business scenarios, like locations, Touch ID, responsive and progressive web apps, and more.

EXECUTE

Orchestrate large suites and execute across platforms for high velocity and parallel test execution. Run as fast as you can with Perfecto — scalable and elastic cloud-based solutions provide you with unparalleled execution to hit tight DevOps release cycles.

LAB

Our cloud-based lab is enterprise-grade, scalable, and secure. We’re proud to offer unrivaled stability. With thousands of real devices and browsers, we’re always on, always current, and we’re simply the best in the business.

ANALYZE

Get an instant overview in a powerful AI-driven management dashboard with Perfecto’s visual analytics. From high-level heatmaps, through CI dashboard, to detailed summaries, you’ll know exactly which tests passed or failed for fast fixes.

Key Benefits

TEST CREATION

- Integrate with test creation frameworks
- Code-based and codeless solutions to match all skillset levels
- Maximize test scenario coverage

TEST EXECUTION

- Automate 90% of your test cases
- Integrate with your favorite automation frameworks and CI servers
- Enterprise-grade elasticity and scaling

CLOUD-BASED LAB

- Always on, always updated, 24/7 access
- Thousands of real devices and browsers — globally spread
- Enterprise-grade security

SMART ANALYSIS

- Fast feedback and defect drill down
- Less noise and fewer false negatives
- Visual analysis and detailed dashboards

Automated Testing On Real Devices & Browsers.

We've perfected the testing process for web and mobile apps. With Perfecto, you'll get a look-and-feel comparison across digital platforms.

Perfecto is open and integrated, so you can continue to use the tools you use and love. As part of your modern DevOps toolchain, Perfecto integrates with all major IDEs, languages, continuous integration tools, and testing frameworks. And you can always rest assured that we'll have the devices, browsers, and user conditions you'll need to test.

MOBILE APP TESTING

Master mobile app testing on over 3000 real devices — not emulators — in our cloud-based lab. Add real user conditions and use your favorite automation testing frameworks, like Appium or Quantum. And get fewer false negatives with AI-backed noise reduction algorithms. We're always updated, always on, and always available for your mobile app testing needs.

CROSS-BROWSER TESTING

Get web app testing that's over 50 percent faster than anyone else, thanks to cross-browser testing in the cloud. Perfecto pairs perfectly with your most-loved automation frameworks, like Selenium. Execute tests quickly to accelerate your DevOps processes. No matter the browser, operating system, or device, we've got you covered for cross-browser testing.

About Perfecto.

Perfecto, a Perforce Software company and market leader in cloud-based automated mobile and web application testing solutions, empowers enterprises with the tools needed to deliver better digital experiences. Perfecto's users can automate continuous testing throughout the DevOps cycle, using a test lab comprised of real browsers and devices. For more information about Perfecto, visit www.perfecto.io.
